File Sharing | Cloud Storage

Dropbox

Understanding 'The Cloud' can be confusing. So think of it as you're putting your files on a storage box that you can access anywhere. Dropbox is also great because it allows you to send large files that email providers can't handle. This is also great for businesses that need an easy way to share and collaborate on files with a team.

Transportation

Uber

Many know Uber for its ride sharing platform. So use Uber to get to that meeting across town. However, many users are also driving with Uber to supplement their income. You get to create your own hours, drive and earn whenever you need to. So if you need to save up for that new camera, new computer or copier for the office...I recommend driving with Uber.
